

PROGRAMMING BEGINNER TO ADVANCED

Welcome To The Programming World Let's Start Programming

1. Open the editor and write down the statements to print the following statements:
a) "We should help everyone".
b) "My name is Somnath. I live in India."
[These should be displayed in two different lines.]

2. Write a program to input four numbers and print their sum on the screen.

3. Write a program to find out the area of a square of side 6 cm.
Area of a square = (side \times side)

4. Write a program covert centigrade to Farahenite. $C = 5/9(F - 32)$ and $F = 1.8 * C + 32$

5. Write a program to find out the area of rectangle. Length=10cm, Breadth= 15cm
Area of a rectangle = length * breadth

6. Write a program to input two numbers [a=25, b= 6] and print their Addition, Subtraction, Division, Multiplication and Reminder.

Output: a + b = 31
a - b = 19
a * b = 150
a / b = 4
a % b = 1

7. Write a program to interchange the values of variable with using third variable.
A=15 B=25 Output: A=25 B=15

8. Write a program to interchange the values of variable without using third variable.

9. Write a program to display bio-data in following format:

Name : XXXXXXXX
Father's Name : XXXXXXXX
Date of Birth : XXXXXXXX
Address : XXXXXXXX
Phone No : XXXXXXXX
E-mail ID : XXXXXXXX
